

UTILITY DRILLING

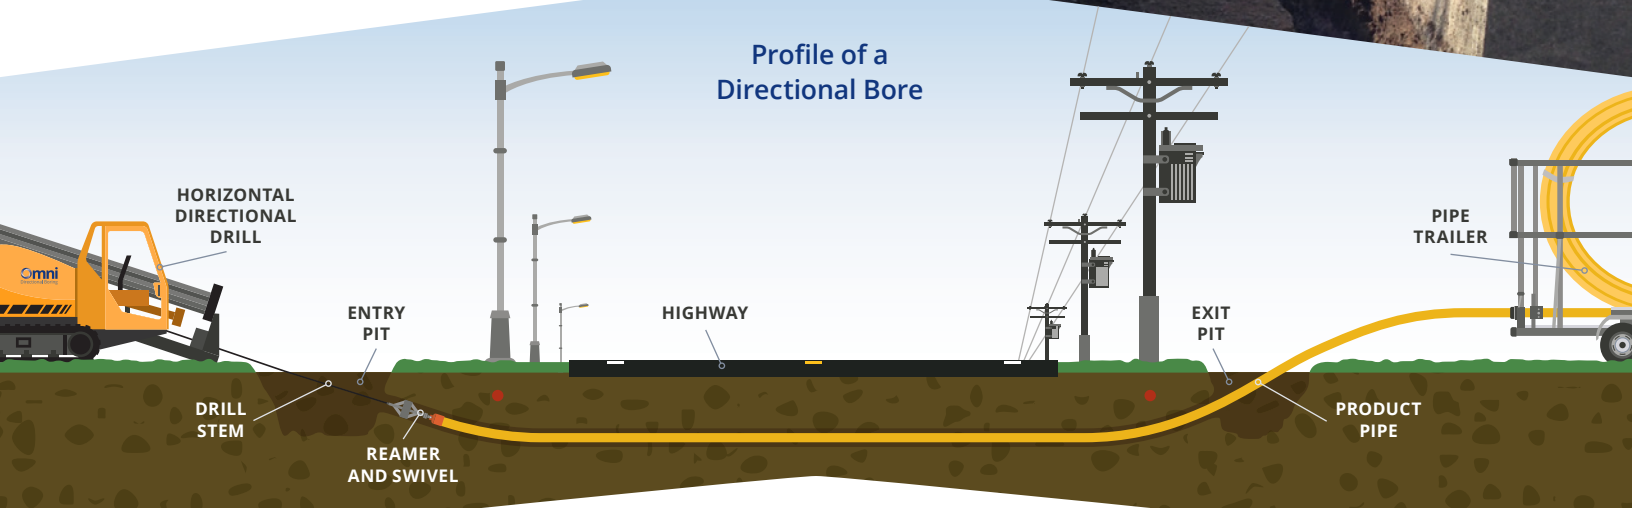

Utility drilling is where it all started for Omni Directional Boring. For decades we have been industry leaders in trenchless installation of residential and rural gas lines, power conduits, and telecommunications lines.

Omni is dedicated to installing new utilities on time and in a safe manner. Our experienced staff and versatile fleet can meet tight requirements in residential neighborhoods. We ensure safety is at the forefront when drilling shallow utilities and crossing complex underground networks in an urban setting.

Profile of a Directional Bore

We look forward to assisting you on your next project.
